

Following is a list of files used to create a bootable CD.

Instructions:

- 1) Set up a new folder on hard drive " C " and label the folder " Create A Bootable CD ".
- 2) Copy the above list of files to the new folder.
- 3) Copy the " exe " file to the new folder.
- 4) Open up the " Autorun.inf " file and re-name " 001.exe " to the " exe " file to burn.
- 5) Burn all of the files in the folder to a CD-R.
- 6) Note: Once the CD has been burned be sure to delete the executable file and change the " Autorun.inf " file back to 001.exe.

You have now created a bootable CD you can use to auto-boot and install programs.
