

Menu Uninstaller

June 27, 2011

Uninstall programs with a click...

A computer wouldn't be much use without programs to run. However, sometimes you can have too many. That can clutter up your computer's hard drive.

Uninstalling unneeded programs is a good idea. But you never seem to get around to it. That's because using Windows' built-in uninstaller is cumbersome and time-consuming.

This simple program may be the answer. It's called Menu Uninstaller.

As the name suggests, it adds an uninstall option to your context menu. Just right-click a program's desktop icon or Start Menu icon. Then click Uninstall. The program's uninstaller runs automatically.

It's a fast and efficient way to weed out programs you don't want.

Systems: Windows XP, Windows Vista, and Windows 7
