

Image Composite Editor (ICE)

Microsoft Image Composite Editor is an advanced panoramic image stitcher. The application takes a set of overlapping photographs of a scene shot from a single camera location and creates a high-resolution panorama incorporating all the source images at full resolution. The stitched panorama can be saved in a wide variety of formats, from common formats like JPEG and TIFF to multi-resolution tiled formats like [HD View](#) and [Silverlight Deep Zoom](#).

This is one of the programs shown during this months demo.
