

# Karen's Print Directory

No more fumbling with My Computer or Windows Explorer, wishing you could print information about all your files. Karen's Directory Printer can print the name of every file on a drive, along with the file's size, date and time of last modification, and attributes (Read-Only, Hidden, System and Archive)! And now, the list of files can be sorted by name, size, date created, date last modified, or date of last access.

Note: This program has been previewed and works great.
