

Kid-Key-Lock

Kid-Key-Lock is a simple program to lock specific keyboard and mouse functions.

Kid-Key-Lock is ideal to be used in order to prevent toddlers from accidentally pressing unwanted buttons on your keyboard and mouse.

When Kid-Key-Lock is running, an indicator icon will appear on your system tray. When you click on the tray icon a pop-up menu will appear. All program functions, including the setup dialog box are accessible from this menu.

The program works on Windows 2000, Windows XP, Windows Vista and the beta version of Windows 7.

Features
